Bengaluru, India

Undergraduate student at **Scaler School of Technology (degree awarded by BITS Pilani)** learning computer science, programming in Java, and front-end web development with HTML and CSS. Passionate about learning by building practical projects from first principles.

EDUCATION

Scaler School of Technology (Degree awarded by BITS Pilani)

2026 – 2029

B.Tech in Computer Science · Bengaluru, India

Coursework: Programming in Java, Data Structures & Algorithms, Web Development Fundamentals (HTML & CSS), Database Concepts.

PROJECTS

Flexbox Quest — Game-Inspired Layout Interface

2026

[HTML](#) · [CSS](#) · [Flexbox](#) · [Responsive Design](#)

- Created a game-inspired interface to practice Flexbox alignment, spacing, layouts, and responsive mechanics.
- Implemented interactive game elements including player coordinates, star collectables, platforms, and a game HUD panel showing lives, coins, and level status.
- Practiced pure modern CSS layout properties (justify-content, align-items, flex-wrap) with zero external libraries.

Student Portal — Academic Interface & Registration

2026

[HTML](#) · [CSS](#) · [Semantic Elements](#) · [Forms & Tables](#)

- Built an academic portal interface created using semantic HTML and custom CSS.
- Structured student profiles, academic schedules with tables, unordered lists, and a course registration form with accessible input fields.
- Focused on clean styling, layout hierarchy, and readable typography across devices.

SKILLS & TECHNOLOGIES

Web Development: HTML, CSS, Flexbox, CSS Grid, Responsive Web Design

Programming: Java (Core & OOP Fundamentals, Problem Solving)

Tools: Git, GitHub, VS Code
